Summary

Data analysis professional with 1.7 years of experience in data analysis and project management, expert in analyzing data with SQL, Python, Power Bi/ Tableau and Excel. Proficient Knowledge in Statistics, Mathematics and other Analytics tools and technologies.

Education

Sinhgad College of Engineering	Pune, India
Bachelor of Engineering in Information Technology	2020 - 2023
MIT Polytechnic	Pune, India
Diploma in Information Technology	2017 - 2020

Experience

Ernst & Young Global Delivery Services (EY GDS)	Pune, India
Associate Data Analyst	08/2023 - Present

Managed complex projects with a focus on timing, functionality, and cost efficiency.

- **Automated processes using Python**, resulting in a 90% reduction in manual effort and significant time savings.
- **Designed a Power BI dashboard for SAM delivery that provided critical insights** regarding client engagement which includes project completion percentage, current cycle timelines, project start/end dates, issue categories, and project status (on track/off track).
- **Led a team of 15 members** in a publisher product data research project, delivering 100% accurate data ahead of the deadline, earning recognition for exceptional performance.
- **Collaborated with Computer Associates and Symantec consulting team** to automate report generation, streamlining processes and improving reporting efficiency.
- **Mentor junior team members** and provide technical guidance

IBM	Remote
Data Analyst Intern	02/2023 - 03/2023

Acquired practical experience and earned certifications in key data analysis and data science concepts, including:

- **Statistics 101**
- **Introduction to Data Concepts**
- **What is Data Science**
- **Google Analytics**
- **IBM SPSS Statics**
- **Developed profit loss prediction model using liner regression algorithm**

Acmegrade	Remote
ML Developer Intern	01/2022 - 02/2022

Gained foundational knowledge of machine learning concepts and algorithms, enhancing understanding of model selection, training, and evaluation

- **Developed a Breast Cancer Detection system** using 3 machine learning models: Decision Tree, Random Forest Classifier, and Logistic Regression, improving prediction accuracy and model performance.
- **Applied machine learning techniques** to real-world datasets, honing skills in model development, feature engineering, and data preprocessing.
- **Built and deployed a House Price Prediction model** as part of my final year engineering project, selecting the best-fit model and creating an intuitive user interface for seamless interaction.

Experience

flexistrategy

Pune, India

Web Developer Intern

05/2019 - 06/2019

flexistrategy is a startup company dedicated to helping businesses grow online by providing high-quality website design services.

- **Developed a user-friendly website** using HTML, CSS, and JavaScript, ensuring a seamless user experience and responsive design.
- **Integrated the Bootstrap framework** to ensure a responsive design, optimizing the website's layout for accessibility and mobile compatibility.

Projects

1. "Jarvis" AI Assistant Using OpenAI:

Built a personal voice assistant using OpenAI technology, with 97% accuracy in voice commands, searches, and responses. Optimized for fast performance, with response times 6.969 seconds. Key features include chatting, opening platforms like YouTube, Google, Instagram, and Facebook, playing music, checking the time, opening the camera app.

2. Sales Dashboard Using Tableau:

[Click here to view dashboard](#)

Created a powerful sales dashboard with Tableau to display key sales metrics and provide valuable insights for better decision-making. Designed an easy-to-use interface for clear, visual representation of important sales data

3. Build Amazon books ETL:

I built an ETL data pipeline using Apache Airflow that extracts best-selling books from Amazon and stores it in a PostgreSQL database. The pipeline runs on a schedule and pulls data from the website.

Skills

Technical Skills: Python, Strong understanding of database management - SQL, Data Visualization - Power Bi, Tableau, Azure(AZ-900), Knowledge of Data governance and compliance, Machine learning, NumPy, Pandas, MATLAB, Google Analytics, ServiceNow, Business Intelligence (BI), Data Structures, Microsoft Office Suite – Word, Excel, PowerPoint, HTML, CSS, Java Script, Data Engineering lifecycle, ETL, Data Mining, Data Modelling, Data Warehouse, Automation, Docker, Cloud Knowledge.

Soft Skills: Time Management, Leadership, Cost Management, Problem Solving, Mentorship, Organizational Skills, Critical thinking.

Tools: ServiceNow, Visual Studio, Power Bi, Tableau, Eclipse, GitHub, PyCharm, Apache Airflow, IBM SPSS, Excel, Power Point, Word.

Awards

Best Employee Spot Award By EY

New Joiner Award By EY

Data Science Bronze Badge
