| <ul style="list-style-type: none"><li>Completed training in data analysis and data science fundamentals, including statistics, analytics tools and data-driven decision making.</li><li>Built a profit-loss prediction model using linear regression, gaining hands-on experience with supervised learning workflows and evaluation.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                               |

Acmegrade

Remote

ML Developer Intern

01/2022 - 02/2022(Internship)

- Developed a Breast Cancer Detection system using Decision Tree, Random Forest and Logistic Regression, comparing performance and documenting results.
- Applied ML techniques (feature engineering, preprocessing, model evaluation) to real-world datasets, building fluency in discussing model behaviour and trade-offs.
- Built and deployed a House Price Prediction model as part of a final year project.

flexistrategy

Pune, India

Web Developer Intern

05/2019 - 06/2019(Internship)

- Developed a responsive website using HTML, CSS, JavaScript and Bootstrap, coordinating requirements and iterating on feedback with stakeholders.

## Projects

---

### 1. "Jarvis" AI Assistant Using OpenAI:

Built a personal voice assistant using OpenAI technology, with 97% accuracy in voice commands, searches, and responses. Optimized for fast performance, with response times 6.969 seconds. Key features include chatting, opening platforms like YouTube, Google, Instagram, and Facebook, playing music, checking the time, opening the camera app.

### 2. Sales Dashboard Using Tableau:

[Click here to view dashboard](#)

Created interactive dashboards for sales KPIs and data-driven decision-making.

## Skills

---

- Technical Skills: Python, SQL, Power BI, Tableau, Machine learning, Google Analytics, ServiceNow, Microsoft Office Suite – Word, Excel, PowerPoint, HTML, CSS, JavaScript
- Soft Skills: Time Management, Leadership, Cost Management, Problem Solving, Mentorship, Organizational Skills, Critical thinking.
- Tools: ServiceNow, Visual Studio, Power BI, Tableau, Eclipse, Jupyter, GitHub, Excel, PowerPoint, Word.

## Certifications

---

- IBM Data Analyst Certified
- Data Science Bronze Badge
- Data Visualization Bronze Badge

## Awards

---

- EY Best Employee Spot Award (2 times)
- EY Achiever Extraordinaire Award (2 times)
- New Joiner Award by EY
